DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1, 3-7, 9, 10, 12-17, 19, 21, 23-27, 29, and 30 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claim1, 3-7, 9, 10, 12-17, 19, 21, 23-27, 29, and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Straub et al (U. S Patent No 6,216,141) in view of Ta et al (U.S. Patent No 6,931,545).
- 4. As per claims 1, 9, 10, 19, Straub et al teach a method of distributing a document of a user, the document including at least one of textural and graphical information, the method comprising registering document distribution services of a plurality of document distribution providers with a document distribution system controller, the document distribution services including at least one of print services, electronic mail services, and publishing services; receiving a distribution request for the document from the user at the document distribution system controller, compiling a list of distribution options for the document with the document

Application/Control Number: 09/782,765 Page 3

Art Unit: 3621

distribution system controller based on the document distribution services of the document a distribution providers, and presenting the list of distribution options for the document to the document provider (see abstract, figs 1, 3, 4, 7, 11, 12 and their accompanied text, and column 2 lines 29-3 lines 67, 9 lines 9-46). Straub et al fail to teach wherein the user provides the content to the system for distribution. However, Ta et al teach a system/method wherein the user provides the content to the system for distribution (see column 5 lines 11-6 line 22). Therefore, it would have been obvious to one of ordinary skill in the art the time the invention was made to modify the invention of Straub et al to include Ta et al's system/method wherein the user provide the content to the system for distribution because this would have ensure that users' content is properly distributed.

5. As per claims 3-7, 1 1-17, 21 and 23-27 and 30, they disclose the same inventive concept as claims 1, 9, 10 and 19. Therefore, they are rejected under the same rationale.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Application/Control Number: 09/782,765

Art Unit: 3621

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to FIRMN BACKER whose telephone number is 571-272-6703. The examiner can normally be reached on Monday - Thursday 9:00 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on (571) 272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov.
